Front-End Developer | Web App Specialist

As Front-End Developer, I specialize in creating web pages and applications, leveraging cutting-edge technologies to build seamless user experiences. With a deep understanding of both **front-end** and **back-end development**, I am proficient in designing **high-performance, scalable** web apps.

Key Technologies & Tools

- Front-End: **React.js, Next.js, TypeScript.**
- State Management: **Redux, Recoil.**
- Styling & UI: **Tailwind CSS, Sass, CSS-in-JS.**
- Back-End: **Node.js, Express.js, Nest.js.**
- Databases: **MongoDB, Sequelize, PostgreSQL.**
- APIs & Integrations: **RESTful APIs, GraphQL, WebSocket, Shopify API.**
- Authentication & Security: **JWT, OAuth2.**
- Testing & Performance: **Jest, Cypress, Testing Library, SEO, Lighthouse.**
- Tools & Methodologies: **Git, CI/CD, Docker, Storybook, Agile (Scrum, Kanban), AWS.**

Experience

Software Engineer – Junior – FAASE (02/2024 – Present)

- **Situation:** As a Junior Software Engineer, I am responsible for developing and implementing Front-End solutions for web applications, ensuring **responsive, scalable, and high-performance interfaces.**
- **Task:** My challenge is to build and maintain modern and efficient systems using **Next.js, React, TypeScript, Node.js, and TailwindCSS**, always prioritizing **performance, SEO, and user experience.**
- **Actions:**
 - ✓ Developed and implemented reusable components, optimizing development time and ensuring design consistency.
 - ✓ Implemented best practices for API requests, improving indexing and enhancing the application's SEO.
 - ✓ Integrated GraphQL connections with Shopify's API, enabling more efficient and flexible queries.
- **Result:** Reduced the time required to launch new features by 30%, making the development process more agile and efficient. Additionally, my work contributed to faster, smoother, and better-ranked interfaces in search engines, enhancing user satisfaction.

Team Management & Coordination – Brazilian Navy (07/2017 – 02/2024)

- **Situation:** As a Corporal in the Marine Corps, I was responsible for **managing and overseeing** the military personnel within my unit, working in the Personnel Division.
- **Task:** My challenge was to **maintain accurate and up-to-date records** of all military personnel, monitor availability, and ensure high standards of discipline, honor, and competence within the unit.
- **Actions:**
 - ✓ Automated control spreadsheets, optimizing personnel management and reducing manual errors.
 - ✓ Created daily reports to provide the unit commander with a clear operational overview.
 - ✓ Implemented team management procedures, fostering a more efficient and professional work environment.
- **Result:** Increased operational efficiency by 50%, streamlining processes and improving accuracy. Additionally, my contributions optimized team workflows and earned recognition for **my leadership, problem-solving skills, and ability to manage subordinates effectively.**

Education

- Faculdade de Informática e Administração Paulista - **FIAP** - Studying 3rd year of **Software Engineering** – Preview of conclusion (12/2026).

Language

- English – Advanced – **FISK** – (07/2017)
- Certificate of Achievement on the Michigan English Test - **University of Cambridge** and **University of Michigan** – 07/2017

Soft Skills

- | | | |
|------------------------|----------------------|----------------------------------|
| • Collaboration | • Flexibility | • Effective communication |
| • Adaptability | • Leadership | • Self-taught |

Recents Complements

- Infrastructure as Code – Alura (06/2025).
- Continuous Integration and Continuous Delivery – Alura (04/2025).
- Getting Started in DevOps – Alura (02/2025).
- Good practices in Node.js with TypeScript – Alura (01/2025).
- Nest.js: Efficient and scalable server-side Node.js applications – Alura (12/2024).
- Authentication, Testing, and Security in Node.js – Alura (11/2024).
