Frontend-Focused Full Stack Developer

Frontend-focused Full Stack Developer building scalable **web** and **mobile** applications using **React**, **Next.js**, and **React Native**. Solid experience designing and maintaining **APIs** with **Node.js** (**Express/NestJS**), and practical experience in a **FastAPI** project integrating **LLM-based workflows**.

Background in the **Brazilian Navy**, where I developed **discipline**, **leadership**, and **operational efficiency under pressure**. I bring that mindset into software engineering, contributing not only with **code** but also with **structure**, **ownership**, and **continuous process improvement**.

PROFESSIONAL EXPERIENCE

Junior Software Engineer – FAASE 02/2024 – Present

Contributing to the development of **web** and **mobile** applications, working across **frontend** and **backend** layers.

Key Responsibilities:

- Developed web applications using **React**, **Next.js**, and **TypeScript**.
- Built complete mobile frontend using **React Native (Expo)**.
- Designed and maintained **REST APIs** using **Node.js (Express/NestJS)**.
- Implemented **asynchronous** API architecture using **FastAPI**.
- Integrated **Google Gemini (LLM)** into **multi-step workflows** using **LangGraph**.
- Implemented **authentication** via **Firebase Auth (REST API)**.
- Developed **web scraping** routines using **Playwright** and **BeautifulSoup**.
- Integrated **GraphQL (Shopify)**.
- Improved **SEO** and **frontend performance**.

Results:

- **Reduced** feature delivery time **by 30%**.
- Structured architecture for communication between **mobile app**, **API**, and **external services**.

Team Management & Operations – Brazilian Navy – 07/2017 – 02/2024

- Managed **personnel operations** and **administrative processes**.
- **Automated internal workflows**.
- Created **operational reports** for leadership.
- Improved team **efficiency** and **operational performance**.

Results:

- **Increased operational efficiency by 50%.**
- **Recognized for leadership, organization, and analytical skills.**

EDUCATION

- **B.Sc. in Software Engineering - FIAP**
Expected Graduation: Dec 2026.

TECHNICAL SKILLS

Front-End:

React.js, Next.js, React Native, TypeScript, TailwindCSS.

Back-End:

Node.js, Express.js, Nest.js, APIs REST, FastAPI (experiência aplicada).

Integração & IA:

LLM Integration (Google Gemini), LangGraph, Pipeline multi-etapas.

Web Scraping:

Playwright, BeautifulSoup.

Infraestrutura:

Git, CI/CD, Docker, AWS.

Best Practices:

SEO, Performance Web, Componentização, Clean Code.

LANGUAGES:

English – Advanced

Certificate of Achievement – **Michigan English Test**.
